

HAZ-CHEM TRAINING

Intro to Working with
Hazardous Chemical
Substances

TRAINING OVERVIEW

More substances and rising production mean more storage, transport, handling, use and disposal of chemicals. The whole lifecycle of a chemical should be considered when assessing its dangers and benefits.

This training enables learners to apply basic health and safety legislation in the form of standards and procedures governing health and safety when working with hazardous chemicals in the workplace.

SUCCESSFUL CANDIDATES CREDITED WITH THIS UNIT STANDARD ARE ABLE TO:

- Gain Insight into chemicals
- Learn biological monitoring and medicals
- Understand and comply with legal requirements of working with hazardous chemicals.
- Understand and implement proactive and reactive control measures.
- Understand and perform first Aid treatment to affected parties.
- Create and maintain a safe working environment.
- Understand procedures when attending to emergencies.

LEARNING ASSUMED TO BE IN PLACE AND RECOGNITION OF PRIOR LEARNING

- No prior learning required

Training Duration

1 Day Training
